The first annual Emergency All-sector Response  
**Transnational Hazard Exercise™**

# EARTH EX™ 2017

## The first annual Emergency All-sector Response Transnational Hazard Exercise™

August 23, 2017 | Venue: Earth

**Exercise materials will be provided to participating organizations and individuals in their own locations, worldwide.**

With modern infrastructure networks interconnected on national and global scales, public and private sector leaders are increasingly focusing on multi-sector planning as an essential foundation to support restoration and sustain affected populations in extreme, “Black Sky” hazard scenarios: Subcontinent-scale power outages with cascading infrastructure failures.

Exercise is critical to any successful plan. For multi-sector planning, exercises that encompass all relevant sectors are, therefore, essential.

On August 23, 2017, a remarkable range of corporations, government agencies and NGOs on three continents are partnering together in a multi-sector exercise of unprecedented scale.

Participation in EARTH EX is by invitation only. For more information, and to request registration, visit [EIScouncil.com/EARTHEX](http://EIScouncil.com/EARTHEX)

### Participating Sectors

#### PRIVATE SECTOR

- Electric Subsector
- Oil and Natural Gas Subsector
- Water and Wastewater Sector
- First Responders
